Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 2, 3, 5, and 6 in the previous office action is withdrawn in view of the newly discovered reference(s) to Sahota and Haverkost et al.

Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 2, and 4-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Sahota (US 2003/0181973 A1).

Sahota discloses a balloon catheter including a catheter shaft 104, a balloon 114 having annular ridges at both ends of the balloon, and a pouch(stent) 700(fig. 7J) disposed between the annular ridges of the balloon. The pouch includes a film 722 impregnated with an agent that is released through the pouch when the balloon is expanded. It is also disclosed that the pouch can be made of polymers [0070].

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3763

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sahota in view of Haverkost et al (US 2003/0139806 A1).

Sahota discloses the invention except for the pouch being made specifically of ePTFE.

Haverkost teaches it is known to made pouches(stents) of ePTFE in [0006]-[0011]. Accordingly, it would have been obvious to modify Sahota's pouch(stent) by making its pouch(stent) of ePTFE, since Haverkost teaches that it is all well known in the art its use to facilitate tissue ingrowth, and its minimal impact on the body.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
